SKIN & BEAUTY

Silipos gels release moisture-rich medical grade mineral oil that gently hydrates, softens, and conditions the skin. Our gloves and socks are beneficial for treating skin conditions such as eczema, psoriasis, and dermatitis while giving the patient a pampered feeling. Our gel forms protect the post-surgical area while releasing medical grade mineral oils that help to reduce scarring while moisturizing the skin.

Our Gel-Care® Advanced product line offers a revolutionary new scar management system using the clinically proven SymRepair® Technology. The gel sheeting can be cut to desired size and the body wraps offer flexibility for hard to reach, bendable areas of the body. Gel-Care® Advanced is an excellent alternative to silicone for the prevention and reduction of scars.

Silipos gels are washable and reusable, and with proper care will continue to release skin- beneficial mineral oils throughout the life of the product.
